

Matthew Lowden

Consultant | IT, Telecoms & Supply Chain

mlowden.co.uk | linkedin.com/in/matthew-lowden

Connecting strategy, data and digital delivery

Experience spanning enterprise IT, telecoms and supply chain leadership, with a focus on sourcing strategy, supplier performance, product introduction and practical digital transformation.

SELECTED EXPERIENCE

Openreach | Senior Manager - Supply Chain Transformation & Procurement

Developing sourcing and supply strategies across a complex engineering portfolio. Combining demand forecasts, supplier capability, inventory, commercial performance and operational risk to support procurement decisions.

Openreach | Product Introduction & Innovation

Earlier work leading the introduction of new fibre products into the supply chain. Collaborating with technical leads, manufacturers, procurement and operations to assess commercial value, supply readiness and long-term sustainability.

DXC Technology | Bionix & Automation Deployment Lead | 2017-2019

Automation tooling deployment across UK & Ireland and EMEA, bringing together lean methods, analytics and digital transformation.

CSC | Platform Capability & Operations Management | 2014-2017

Enterprise infrastructure monitoring, event and incident lifecycle management, and leadership of remote monitoring operations across UK accounts.

SELECTED CONTRIBUTIONS

Supplier performance: Analysis across cost, delivery, lead time, inventory exposure and supply risk to support commercial decisions.

Product introduction: Business cases linking demand forecasts, inventory strategies and supply requirements, supporting product owners through launch readiness.

Governance and analytics: Frameworks, dashboards, KPIs and self-service analytics improving visibility of demand, stock, supplier risk and financial impacts.
